Chairman Julius Genachowski
Federal Communications Commission
445 12th Street, SW
Washington, D.C. 20554

Dear Chairman Genachowski:

I am writing you today to express my support of AT&T's proposal to merge with T-Mobile USA, which is under review in the Commission's 11-65 docket. It is extremely important for California to get the best mobile broadband network available so that they are able to succeed in these tough economic times.

Lincoln Training Center serves over 500 clients annually at more than 50 job sites throughout California. Our mission is to create successful employment partnerships between the business community and persons with disabilities. We have worked hard to enhance California's economic development and we're excited about the new possibilities that this proposed acquisition will mean to our businesses and to our everyday lives.

We have noticed that many of California's businesses now find state of the art technology a necessity to conduct their business and to compete on a global level. If California wants to continue to build their economic climate, then this acquisition must happen and it must happen quickly.

This proposed acquisition will provide technological advancements businesses need. Not only will the enhancements to the network infrastructure support innovation, it will help our state continue to cultivate start-up companies which also means more jobs and economic growth.

This acquisition will help improve service for customers as AT&T will increase its network infrastructure to provide reliable mobile broadband service to an additional 55 million people.

We hope the Commission will support this merger, which will mean better service and greater access to fast wireless Internet services.

Sincerely,

Caron Nunez
President, Lincoln Training Center
